Work Experience

Omukk

Jun 2025 - Sep 2025

Software Development Intern

- Worked on the whole UI/UX and integrated API's of a **higher study consultancy platform** translating **Figma designs** into a robust front-end interface. This platform included multi-step forms and different dashboard for different user roles (admin, agent, student).
- Developed a **responsive fundraising website** inspired by GoFundMe.
- Tools Used: React · Typescript · Tailwind CSS · Zod · React-hook-form · React-router

Projects

Sexual Harrasment Prevention and Protection Cell (2024)

CSE350 [🔗](#)

- Built a **web platform for sexual harrassment reporting and tracking** for our University which was awarded **runners up** for **E-governance and Innovation Showcasing**. Entire project was maintained with proper requirements engineering and software development life cycle.
- Tools Used: Figma · React · Express.js · Tailwind CSS · MongoDB · Postman

Sport Station (2023)

Sport Station [🔗](#)

- Designed and developed a full-stack **online sports shop** as a single vendor e-commerce to sell various sports instruments. Used ExpressJS and MySQL together without any ORM.
- Tools Used: React · Express · MySQL · Bootstrap

Course Management System (2023)

CMS [🔗](#)

- Developed a **student-teacher course management platform** using relational database. Used Apache tomcat server for JSP pages.
- Tools Used: Apache TomCat · JavaServer Pages (JSP) · MySQL · Bootstrap

Sneaky (2022)

Sneaky [🔗](#)

- Developed a **children's word making game** using **Java Swing**. The player has to move a snake avoiding obstacles and dangers to collect letters for making the word in the display.
- Tools Used: Java · Java Swing

Solo Projects (2025)

dudedid [🔗](#) three6IX [🔗](#)
finvis [🔗](#)

- Developed a priority based [kanban style task tracker](#) [🔗](#) with database and google authentication integration using supabase. Implemented a [Korean party game](#) [🔗](#) in React for fun. Tried some libraries for visualizing [cryptocurrency prices and stock market](#). [🔗](#)
- Tools Used: Docker · React · Tailwind CSS · vercel · Supabase

Competitive Programming Experience

- Participated in Intra SUST programming contest 2023, and [ICPC Asia Dhaka Regional Site Online Preliminary Contest](#) [🔗](#) in 2022 and 2021 .
- Solved more than 500 problems in [codeforces](#) [🔗](#) (max rating 1371), more than 100 problems in [leetcode](#) [🔗](#) (max rating 1424) etc.

Education

Shahjalal University of Science & Technology

Feb 2020 – Jul 2025

B.Sc. in Computer Science & Engineering

CGPA: 3.40/4.00

Hackathon Experience

- Runners up for **E-governance and Innovation Showcasing** in SUST - 2024
- Attended the prestigious [Code Samurai 2024 Preliminary](#) and moved on to the next round with selected top 300 teams in Bangladesh.
- Became **champion** in Leading University hackathon 2022 by building an MVP of multi vendor e-commerce with features of **pro users, payment gateway, bidding** for customers and others.

Language, Technologies and Tools

C, C++, Java, Python, SQL, JavaScript, TypeScript, NodeJS, ExpressJS, React, MongoDB, Linux, Git, VSCode, Postman, Docker, AWS

Co-Curricular Experience

- Organized workshops on git, software development, hackathon as a **Secretary of Organizing** (Deputy Head of a team of 9 persons) in [SUST ACM Student Chapter](#).
- Organized hackathon in **SUST CSE Carnival 2024** leading a team of 15. Worked as a sub editor in the carnival magazine as **Publication Secretary** of CSE Society, SUST.
- Have a diverse experience of volunteering including **WordCamp Sylhet**.

Research

Application Agnostic Performance Measurement Framework for Self Sovereign Identity based Applications

2024 - 2025

- Worked on our undergraduate thesis which focuses on building a **performance measurement framework** for blockchain based SSI applications. It focuses on simulating and testing various SSI cloud agent api's integrating **JMeter, Prometheus and Grafana** to show the performance comparison.

Multimodal song genre classification from Bangla lyrics(text and audio)

2024 - 2025

- Worked on a machine learning project for academic outline which focuses on comparing and evaluating model performances for best results on Bangla song genre classification. We used CNN, FNN, various BERT models and transformer models i.e. DistilHuBERT, ASTFineTuning, Wav2Vec2
